

KONE MaxiSpace™ noise-reduction package

Quieter lift operation means a more pleasant ride for passengers and less disturbance for people in apartments adjacent to the shaft. Our noise-reduction package for existing KONE MaxiSpace™ lifts comprises new pulleys and isolated guiderail clips, as well as replacement machine bed-plate isolation – all with an improved design that minimizes noise generated by lift operation.

KEY BENEFITS

- Reduces noise and vibration generated by lift
- Improves ride comfort for passengers
- Minimises disturbance to building residents

TECHNICAL INFORMATION

- Installation time:
2 working days
- Components replaced:
 - Car and shaft pulleys
 - Guiderail retenting clips
 - Machine bed-plate isolation material
